Available May 1, 2027

Education

Northeastern University Dec. 2027 | GPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration *Boston, MA*

Coursework: Computer Systems, Computer Networks, Computer Architecture, Algorithms & Data Structures, Object-Oriented Design, Foundations of Software Engineering, Systems Security, Cybersecurity, Data Science

Honors: Dean's List (all semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor

Experience

Klaviyo Jan. 2027 – Apr. 2027

Software Engineering Co-op *Boston, MA*

- Joining the Customer Agent team, building Klaviyo's AI agent that answers shoppers across chat, email, and SMS

Wayfair Jul. 2026 – Dec. 2026

Software Engineering Co-op *Boston, MA*

- Built and presented Harbor, an internal tool routing tasks to the best-fit, lowest-cost LLM/agent (Codex, Claude Code, Devin, Cursor) and running up to 10 concurrent agent sessions across the SDLC; adopted by 100+ engineers
- Owned gift card cash-out end to end across 3 teams for an October 2026 legal deadline: a federated eligibility schema, 50-state rules engine, zero-out API, and UI replacing a manual register payout behind thousands of tickets

Wolters Kluwer Jul. 2025 – Jun. 2026

Software Engineering Co-op *Boston, MA*

- Drove a json-io upgrade across 20+ Java Spring microservices; root-caused the failures to upstream bugs and contributed 2 major fixes to the OSS project, cutting payload size 35% and inter-service latency 28%
- Implemented OIDC authentication across 20 enterprise health systems via Azure Front Door and Entra ID, securing access for 10K+ clinicians while standardizing security posture across environments
- Shipped RAG search in the clinician web app for Expert AI, scoped to a clinician's Azure SSO profile, serving 78K queries/month over a LlamaIndex index of 100K+ records built through Kafka, BigQuery, and Airflow

SculptAI Jan. 2025 – Present

Software Engineer *New York, NY*

- Shipped Sentinel, an AI SRE agent in production that triages P0/P1 incidents, correlating Prometheus, Tempo, and Loki telemetry into likely root causes for the on-call engineer and cutting MTTR from 45 to 12 minutes
- Engineered the full-stack application (Flask, Redux, React Native/Expo, Redis) serving 1,000+ users
- Built an agentic recommendation pipeline with Google ADK, orchestrating seven linked agents (Decoder, Planner, Validator, Memory, and others) to generate and validate tens of thousands of personalized workout plans

Chevron New Energies May 2024 – Aug. 2024

Software Engineer Intern *Houston, TX*

- Orchestrated 200+ Azure Data Factory pipelines moving oil rig sensor data to analytics at a 99.95% success rate

Projects

Kepler | *Rust, Raft, LSM-tree, MVCC, Tokio* Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus (leader election, log replication, membership changes) and an LSM-tree engine (memtable, WAL, leveled SSTables)
- Added an MVCC layer for snapshot isolation and linearizable reads; deployed in SculptAI's infrastructure to replace managed etcd, cutting infra cost $2,500/month while raising TPS headroom 30%

Argus | *Fraud Detection* | *Python, PyTorch, MLflow, Redis, FastAPI, AWS ECS* Jan. 2026 – Aug. 2026

- Built near-real-time transaction fraud scoring: 40 velocity and deviation-from-profile features served from Redis Streams through a REST endpoint at 200ms p99, autoscaling on AWS ECS
- Trained on a 0.5% fraud rate with class weighting and point-in-time-correct backfills to prevent label leakage; cost-sensitive thresholds let risk tune per fraud type, cutting losses 15% and false positives 10%

Skills & Interests

Languages & Tools: Rust, Go, Python, C++, C, Java, TypeScript, JavaScript, Kotlin, Swift, Bash, SQL, PostgreSQL, MySQL, MongoDB, gRPC, GraphQL, Linux, Docker, Kubernetes, Terraform, Buildkite, AWS, Azure, GCP

Frameworks & Libraries: React, React Native, Next.js, Node.js, Flask, FastAPI, Spring Boot, Redux, PyTorch

AI / Agentic Tooling: Google ADK, Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Interests: Avid Cleveland Browns fan, Weightlifting, Rock Climbing, BJJ, Running
